EXPERIENCE

Analyst/A4/Software Engineer:
(Apr- 2022 - Present)
CAPGEMINI - Bangalore

PROJECTS:

- **Mini projects**: simple calculator.
- **Final Year Project Title** : FAKE REVIEW DETECTION USING MACHINE LEARNING.
- Description:

  In these project each review goes through tokenization process first , then unnecessary words are removed and candidate feature words are generated.

  These system is very fast due to semi supervised and supervised learning focused on the content of the review based on approaches as we have used word frequency count , semi polarity and length of review ,where we have used some of the known algorthms like knn,label propagation , label spreading,multi layer perception.

- Currently working project:

  Currently I'm working on ETS project, with in Capgemini for .net applications.
